## **1. PURPOSE**

The Internal Regulations for Conduct in the Securities Markets (the "**Regulations**" or the "**Code**"), which form part of the governance system of Oryzon Genomics, S.A. (the "**Company**"), are issued for application within the Company. The Regulations establish the rules for the management, control and transparent communication of Inside Information, as well as for the performance of treasury stock transactions, imposing certain obligations, limitations and prohibitions on Subject Persons, Insiders and Treasury Stock Portfolio Managers, all with a view to safeguarding the interests of investors in the Company's securities and preventing and avoiding any situation of abuse, without prejudice to encouraging and facilitating the participation of its directors and professionals in the Company's capital within the strictest respect for the law in force.

The Regulations were initially approved by the Board of Directors of the Company held on 2 October 2015, and have been amended on 18 September 2018, 18 December 2020, and 24 July 2023.

Although Royal Decree-Law 19/2018 of 23 November on payment services and other urgent measures in financial matters abolished the obligation for issuers to have internal rules of conduct, within the framework of best corporate governance practices, the Company's Board of Directors considers it appropriate to continue to have such rules, insofar as they constitute an effective tool for the Subject Persons to have a text that systematically compiles certain rules of conduct applicable to them on various matters relating to the securities markets that affect Oryzon Genomics, S. A., as a listed company, all in accordance with Law 6/2023 of 17 March on Securities Markets and Investment Services (the "**LMVSI**"), Regulation (EU) No 596/2014 of the European Parliament and of the Council of 16 April 2014 on market abuse (the "**MAR**") and, in general, in accordance with the applicable legislation and regulations.

## **2. DEFINITIONS**

**(ii) External Advisors:**

**(viii) Inside Information:**

Pursuant to article 226 of the LMVSI and article 7.1 of the MAR, Inside Information is understood to mean information of a precise nature that has not been made public and refers, directly or indirectly, to the Company or one or more Marketable Securities or Financial Instruments issued by the Company or their related derivative instruments, and which, if it were made public, would be likely to have a significant effect on the prices of those Marketable Securities or Financial Instruments in a market or organised trading system.

In accordance with article 7.2 of the MAR, information shall be deemed to be of a precise nature if it indicates a set of circumstances which exists or which may reasonably be expected to come into existence, or an event which has occurred or which may reasonably be expected to occur, where it is specific enough to enable a conclusion to be drawn as to the possible effect of that set of circumstances or event on the prices of the Marketable Securities or Financial Instruments in question or, where applicable, any related derivative financial instruments.

In the case of a protracted process that is intended to bring about, or that results in, particular circumstances or a particular event, those future circumstances or that future event, and also the intermediate steps of that process which are connected with bringing about or resulting in those future circumstances or that future event, may be deemed to be precise information.

### **3. SCOPE OF APPLICATION**

Unless explicitly stated otherwise, this Code shall apply to Subject Persons, Treasury Stock Portfolio Managers and to the Insiders (during the time they are included in the Insider List and until the Inside Information that led to the creation of the Insider List is disclosed to the market by virtue of the communication required under the applicable regulations or otherwise ceases to have such status and is therefore notified by the Compliance Officer or, by delegation thereof, by the management or area responsible for the transaction, operation or internal process in question).

Accordingly, they shall adopt the appropriate measures to prevent such information from being subject to abusive or unfair use and, where appropriate, immediately take the necessary actions to address the consequences that may arise thereof, all without prejudice to the duty to communicate and collaborate with judicial and administrative authorities under the terms established by law.

### **4.1. Handling of Inside Information**

In accordance with article 14 of the MAR, Subject Persons privy to any type of Inside Information:

- (a) Shall abstain from preparing or performing, directly and indirectly, for their own account or for the account of a third party, any type of transaction (including acquisition, transfer or assignment) involving the Company's Marketable Securities and Financial Instruments. A Personal Transaction with Inside Information will likewise be construed as the use of this sort of information to cancel or modify an order regarding the Affected Security to which the Inside Information refers, when the order was given before the Inside Information was obtained. They shall also refrain from merely attempting to execute any of the aforementioned transactions.

Excluded from this shall be preparing and executing transactions whose very existence constitutes the Inside Information, as well as any transactions executed to comply with a previously expired obligation to acquire or transfer Marketable Securities or Financial Instruments, where that obligation is provided for in an agreement entered into before the Subject Person or Insider came into possession of the Inside Information, or by a manager under a discretionary portfolio management agreement signed by the Subject Person, their Closely Associated Persons or an Insider, or other transactions executed in accordance with applicable regulations..

The delivery of Company shares or share options to Insiders by virtue of an obligation that has already expired, within the framework of the remuneration systems approved by the Company and not in order to circumvent the prohibition of Insider Trading shall not be deemed to be included in this section.

- (b) They shall not disclose Inside Information to third parties, unless this is necessary in the normal exercise of their employment, profession, position or duties are bound by a legal or contractual obligation of confidentiality, and have confirmed to the Company that they have the necessary resources to safeguard confidentiality

change to orders involving the Company's Marketable Securities or Financial Instruments.

- (d) In general, they shall comply with all the provisions laid down in applicable legislation and this Code.

The above conduct shall be presumed to have been carried out by a Subject Person not only when it is undertaken directly, but also when it is undertaken through the intermediary of a Subject Person.

Likewise, Subject Persons in possession of Inside Information and, in any case, Insiders, shall be under the obligation to:

- a) safeguard the confidentiality of the Inside Information to which they have access, without prejudice to their duty to communicate and collaborate with the judicial and administrative authorities under the terms provided for in the MAR and other applicable legislation.

Likewise, Subject Persons and Insiders in possession of confidential documentation must act with diligence in their use, handling, and treatment, and shall be responsible for their custody and conservation and for maintaining its confidentiality.

For the purposes described above, a Subject Person will not be deemed to have been involved in Insider Dealing in the following circumstances:

a) Whenever said person executes a transaction to acquire, transfer or assign Affected Securities and the transaction is carried out in good faith and in compliance with an obligation due and not seeking to evade the ban on Insider Dealing, and:

(i) Said obligation arises from an order given or agreement reached before the person in question had knowledge of the Inside Information, or

(ii) The purpose of said transaction is to satisfy an already existing legal or regulatory provision before the date on which the person in question had knowledge of the Inside Information.

b) In general, all engagements carried out in compliance with applicable legislation.

#### **4.2 Disclosure of Inside Information**

As soon as possible, the Company will publicly disclose all Inside Information directly concerning it by reporting it to the Spanish National Securities market Commission ("CNMV"). It must not disclose Inside Information by any other means without having already released to the CNMV.

Moreover, the content of Inside Information disclosed to the market through any information or communication channel other than the CNMV must be identical to that reported to the CNMV. Moreover, where a significant change is made to the Inside Information which has been disseminated, that change must be communicated to the market in the same manner.

The content of the communication shall be truthful, clear and complete. Information shall be presented in a neutral, without bias or value judgements that prejudice or distort its scope, the same criteria shall apply to Inside Information irrespective of whether it may have a favourable or adverse influence on the price of the Company's Marketable Securities or Financial Instruments, or of the related derivative instruments related thereto.

When the Company makes public projections, forecasts or estimates of accounting, financial or operational, the content of which may be considered as Inside Information, the following conditions must be observed:

- a) Estimates or projections of accounting magnitudes, subject to hypotheses or basic assumptions used in their calculation, shall be prepared on a basis consistent with the accounting policies and rules applied in the preparation of the annual accounts and shall be comparable with the information in the financial statements published in the past and with the information to be disclosed by the Company in the future.
- b) This type of information must be clearly identified, specifying that it is a projection, forecast or estimate of the Company, and that as such do not constitute guarantees of future performance and are subject to risks, uncertainties and other factors that may cause that final results differ materially from the Company's expectations.
- c) It should be clearly differentiated whether what is being communicated are operational objectives or merely estimates or forecasts of the Company's expected performance. In addition, the time horizon to which the estimates or projections provided refer should be identified and the underlying assumptions, estimates or forecasts on which they are based.

Finally, the Company shall not combine, in a manner that may be misleading, the dissemination of Inside Information to the market with the marketing of its activities.

The Company may delay public disclosure of Inside Information, provided that all the following conditions are met:

- (i) An immediate disclosure could undermine the legitimate interests of the Company;
- (ii) Any delay in disclosure is not likely to mislead or confuse the public; and
- (iii) The Company is capable of guaranteeing the confidentiality of the Inside Information.

In compliance with the recommendations and guidelines of the European Securities and Markets Authority (ESMA):

a) Within point (i) (Immediate disclosure may prejudice the legitimate interests of the Company), the following circumstances, inter alia, may be included:

- a) that the Company is engaged in negotiations the outcome of which may be jeopardised by the immediate disclosure to the public. Examples of such negotiations may include mergers, acquisitions, demergers and spin-offs, acquisitions and disposals of significant assets or divisions of corporate activity, restructurings, and reorganisations.
- b) the financial viability of the Company is in serious and imminent danger, but not within the scope of insolvency law, and an immediate public disclosure of the inside information would seriously harm the interests of the Company's existing and potential shareholders by threatening the conclusion of negotiations aimed at securing the financial recovery of the Company.
- c) the inside information relates to decisions taken or contracts entered into by the board of directors of the company which requires, under national law or the issuer's articles of association or by-laws, the approval of another body of the issuer, other than the ordinary meeting of shareholders, in order to be effective, in the event that:
  - (i) the immediate public dissemination of such information prior to such final decision would jeopardise the proper assessment of the information by the public.
  - (ii) the Company has taken the necessary precautions to ensure that the final decision is taken as quickly as possible.
- d) the Company has developed a product, or an invention and the immediate public dissemination of such information may damage the intellectual property rights of the issuer.
- e) that the Company is planning to purchase or transfer a controlling interest in another entity and the disclosure of such information could disrupt the implementation of that plan.
- f) that a previously announced transaction is subject to the approval of a public authority and that such approval is subject to additional requirements, where the immediate disclosure of such requirements may affect the Company's capability to comply with them and therefore prevent the transaction or arrangement from being successfully concluded.

Pursuant to Article 17(7) of the MAR, even in cases where the immediate dissemination of inside information may adversely affect the legitimate interests of the Company, whenever confidentiality is no longer guaranteed, the Company shall disclose such inside information to the public swiftly.

b) Within point (ii) (situations where delay in the dissemination of inside information is likely to mislead the public), in compliance with ESMA guidelines, the following circumstances, inter alia, may be included:

- a) that the inside information the disclosure of which the Company intends to delay is materially different from what has previously been publicly announced by the Company on the matter to which the inside information relates; or
- b) that the inside information the disclosure of which the Company intends to delay refers to the fact that the Company's financial objectives would be unlikely to be achieved if those objectives had been previously publicly announced; or
- c) that the inside information the disclosure of which the Company intends to delay contrasts with market expectations, if such expectations are based on signals that the Company has previously made available to the market, such as interviews, roadshows or any other type of communication organised by or with the approval of the Company.

In the case of a protracted process that takes place in different phases with which it is expected to generate or that it has as a result certain circumstances or a specific fact, the Company will be able to delay publicly disclosing the Inside Information regarding that process, subject to the provision contained in the aforementioned points (i), (ii) and (iii). Should the Company delay disclosing Inside Information, it must inform the CNMV immediately after publishing the information that it was disclosed with a delay under the terms and to the extent provided for in the legislation

If, having delayed the public disclosure of Insider Information, its confidentiality is no longer guaranteed, the Company shall disclose this as soon as possible. Cases in which a rumour refers in an express way to Inside Information whose disclosure has been delayed when the degree of accuracy of the rumour is enough to indicate that the confidentiality is no longer guaranteed.

As per Commission Implementing Regulation (EU) 2016/1055 of 29 June 2016 laying down implementing technical standards with regard to the technical means for appropriate public disclosure of inside information and for delaying the public disclosure of inside information (Implementing Regulation 2016/1055), the Company must retain the following information:

1. Dates and times when:
  - (i) The inside information first existed within the Company;
  - (ii) The decision to delay the disclosure of inside information was made; and
  - (iii) The fact that the issuer is likely to disclose the inside information.
2. The identity of the persons within the issuer responsible for:
  - (i) Making the decision to delay disclosure and deciding on the start of the delay and its likely end;
  - (ii) Ensuring the ongoing monitoring of the conditions for the delay;
  - (iii) Making the decision to publicly disclose the inside information; and
  - (iv) Providing the requested information about the delay and the written explanation to the CNMV.

3. Evidence of the initial fulfilment of the conditions allowing for the disclosure of inside information to be postponed, and of any change of this fulfilment during the delay period, including:

- (i) The information barriers which have been put in place internally and with regard to third parties to prevent access to inside information by persons other than those who require it for the normal exercise of their employment, profession or duties within the issuer; and
- (ii) The arrangements put in place to disclose the relevant inside information as soon as possible where the confidentiality is no longer ensured.

Publicly disclosed Inside Information shall be published on the Company's website. The Company shall include and keep on its corporate website, for a period of at least five years, all the Inside Information that it is required to make public.

## **5. INSIDER DEALING**

Insider Dealing shall be taken to mean any transactions performed by a Subject Person in possession of Inside Information, and in all cases Insiders, who use that information by acquiring or disposing of, for their own account or for the account of a third party, directly or indirectly, the Company's Marketable Securities or Financial Instruments to which that information relates.

The use of Inside Information by cancelling or amending an order concerning the Company's Marketable Securities or Financial Instruments to which the information relates where the order was placed before the person concerned possessed the Inside Information, shall also be considered to be Insider Dealing.

Also, recommending that another person engage in Insider Dealing, or inducing another person to engage in Insider Dealing, arises where the person possesses Inside Information and:

- (i) Recommends, on the basis of that information, that another person acquire or dispose of the financial instruments to which that information relates, or induces that person to make such an acquisition, transfer or assignment; or
- (ii) Recommends, on the basis of that information, that another person cancel or amend an order concerning the financial instrument to which that information relates, or induces that person to make such a cancellation or amendment.

Where a person uses a recommendation or inducement referred to in the previous point to perform a transaction and knows or ought to know that it is based upon Inside Information, this transaction shall also be considered Insider Dealing.

## **6. RULES OF CONDUCT CONCERNING MARKETABLE SECURITIES AND FINANCIAL INSTRUMENTS**

### **6.1. Blackout periods**

The members of the Board of Directors of the Company and the Senior Managers shall refrain from entering into transactions with the Company's Marketable Securities or Financial Instruments during the following blackout periods:

### **6.2. Trading during a limited period**

Without prejudice to the foregoing prohibitions, the relevant members of the Board of Directors of the Company and the Senior Managers may, on an exceptional basis, request authorisation from the Compliance Officer to carry out transactions during the Closed Periods affecting them and the Compliance Officer may grant such authorisation provided that there are circumstances that justify it and it is possible in accordance with applicable regulations, leaving a sufficient record of the reasons for the authorisation.

### **6.3. Obligation to notify.**

The members of the Board of Directors of the Company, the Senior Managers and their Closely Associated Persons must inform the Compliance Officer and the CNMV in writing of every transaction conducted on their own account or on account of a third party or through intermediary persons or entities relating to the Company's Marketable Securities and Financial Instruments, and any of the transactions stipulated in article 19.7 of the MAR totalling EUR 20,000 in a calendar year or a different amount that may be set by the CNMV or the applicable regulations at any given time. The threshold of EUR 20,000 shall be calculated by adding, without netting, all transactions executed (including those of opposite signs). Transactions performed by Closely Associated Persons are treated the same as transactions on Subject Persons' own account and must therefore be reported. Reached the threshold,, Subject Persons must report all the subsequent transactions conducted.

Notifications must be issued without delay and no later than three Business Days after a transaction is executed. Any persons bound by this Code of Conduct for any reason must report transactions involving the Company's Marketable Securities and Financial Instruments on the date they become bound by the Code.

Notifications must include:

- (i) The name of the person;
- (ii) The reason for the obligation to notify;
- (iii) A description of the Marketable Security or Financial Instrument;
- (iv) The nature of the transaction;
- (v) The date and market on which the transaction was executed; and
- (vi) The price and volume of the transaction.

The Compliance Officer will keep a register of the Company's Marketable Securities and Financial Instruments held by the members of the Board of Directors, the Senior Managers and their Closely Associated Persons. At least once a year, the Compliance Officer may request the members of the Board of Directors, the Senior Managers Subject Persons and their Closely Associated Persons the confirmation of the balances of Marketable Securities and Financial Instruments included in the register.

The information in the register of the Company's Marketable Securities and Financial Instruments must be kept for at least five years after it was recorded or last updated. The content of the register shall be confidential and may only be disclosed to the Board of Directors or anyone authorised by the Board to access it for a specific reason, as well as to the judicial and administrative authorities in relation to any pertinent proceedings.

The notification requirement laid down in this Article shall also apply to transactions decided on, even without the intervention of the obliged person, by portfolio managers or authorised agents. The relevant members of the Board of Directors of the Company, the Senior Managers and their Closely Associated Persons who have entrusted third parties with the management of securities or have granted powers of attorney to operate in the securities market shall either exclude Marketable Securities and Financial Instruments from the scope of the management or proxy, or to put in place the necessary mechanisms to ensure that transactions in Transferable Securities and Negotiable Securities and Financial Instruments are promptly reported in accordance with the provisions of these Regulations and the applicable laws and regulations.

## **7. PORTFOLIO MANAGEMENT**

The following rules are to apply vis-à-vis portfolio management contracts entered into by Subject Persons with institutions authorised to perform this investment service:

- (i) **Content of discretionary portfolio management contracts:** on the full understanding that such contracts grant the powers to make an investment decision to a manager acting for and on behalf of their principal, but professionally and independently, Subject Persons must ensure that these contracts contain clauses establishing one or more of the following conditions:
  - (a) It is absolutely and irrevocably guaranteed that the transactions will be made without any intervention of the Subject Person and, therefore, exclusively under the professional criteria of the manager and according to the criteria applied in general for clients thereof with similar financial and investment profiles; and

- (b) Immediate notification is given of the execution of the corresponding transaction involving Marketable Securities and Financial Instruments to ensure the aforementioned individuals can fulfil their duty of disclosure stipulated in article 6 of this Code.
- (ii) **Notification:** Subject Persons who enter into a discretionary management portfolio contract are to send a copy of the same to the Compliance Officer within three days of it being signed. If the Compliance Officer were, with reason, to consider that the contract does not comply with the provisions of point (i) above, it is to notify the Subject Person so that the agreement can be duly amended. Until such an amendment has been made, the Subject Person is to order the manager to not carry out any transaction with the Marketable Securities and Financial Instruments.
- (iii) **Informing the manager:** Subject Persons must ensure the manager of their securities portfolio is aware of the rules of conduct the Subject Person has to adhere to, and that the manager acts accordingly. The Subject Person will be responsible for considering whether the aforesaid contract should be terminated if their manager breaches any of the provisions of this Code of Conduct.
- (iv) **Prior contracts:** Contracts enter into by a Subject Person prior to this Code coming into effect are to be brought into line with the provisions set out herein; the provisions of point (ii) above on the prohibition of carrying out transactions involving the Marketable Securities and Financial Instruments are to apply in the meantime.

## **8. RULES OF CONDUCT REGARDING INSIDE INFORMATION**

The Compliance Officer shall be informed when Inside Information is generated and therefore, an Insider List is created. The Compliance Officer will then:

- (i) Assign a code name to the legal or financial transaction in question and provide it to each of the parties involved in the transaction. The code name will be used to identify the transaction or project, thereby avoiding the use of its actual name. It will be used in all communications regarding the transaction so that the parties involved and the nature of the transaction cannot be revealed. The relevant section of the Insider List will also be identified with the same code name.
- (ii) Ask the persons in and outside the Company who are fully or partially aware of the existence of the Inside Information to provide confirmation of the reason why they know or should know about the information and the date and time they became aware of it.

If the Company deems there are legitimate reasons to delay the disclosure of Inside Information, this must be reported to the Compliance Officer as well as the person or persons deciding to

postpone disclosure and the reasons and justification for this decision, so that all the other legal requirements concerning delays in disclosure can be met.

The information shall be strictly restricted to those persons in and outside the Company to whom the information must be revealed, always within the normal course of their employment, profession or post. The Compliance Officer must be notified of the names thereof, the reason why they have access to the information and the date on which they gained access to it.

Any indications of abusive or unfair use of the Inside Information must be reported to the Compliance Officer.

For each legal or financial transaction that would be likely to have a significant effect on the prices of the Marketable Securities and Financial Instruments of any nature issued by the Company, the Compliance Officer shall create and update an Insider List using the templates established in Commission Implementing Regulation 2016/347. This list must contain at least the following information:

- Names of the Insiders;
- Their professional and personal telephone numbers;
- Their company names and addresses, if applicable;
- Their personal full home addresses;
- Their function and reasons for obtaining access to the Inside Information;
- The dates and times at which the persons obtained access to the Inside Information; and
- The date on which the list was created.

The Insider List needs to be updated immediately (giving the date and time of each update) in the following cases:

- Where there is a change in the reasons why a person is included on the Insider List;
- When a new person needs to be added to the Insider List;
- When a person on the list ceases to have access to Inside Information, in which case the date and time on which they ceased to have such access must be recorded; and
- When the information is no longer Inside Information, i.e. when it has been made public.

When Inside Information has to be included in annual accounts and/or interim financial information, an Insider List will need to be created regarding the Inside Information they contain.

It will not be necessary to prepare an Insider List for those operations or processes of a recurrent nature (such as the preparation of the accounts and regulated financial reporting) in which only Subject Persons included in the Subject Persons Register participate.

If a supplementary section has been included in the Insider List containing information about individuals who, because of the nature of their role or job, have access at all times to all the Inside Information of the Company ("Permanent Insiders"), these individuals must not be included in any other specific section of the Insider List.

The information in the Insider List must be kept for at least five years after it was recorded or last updated.

The Compliance Officer will keep an electronic copy of the Insider List, which will be available to the supervisory authorities. The format of the electronic file will ensure: (a) the confidentiality of the information included, (b) the accuracy of the information in the Insider List; and (c) access to the previous versions of the list and the recovery thereof.

The Compliance Officer will advise Insiders of the confidential nature of the information, of their duty to safeguard the confidentiality of said information, the ban on the use thereof, as well as the violations and penalties that could arise following an inappropriate use of the information. The Compliance Officer will also advise them of their obligation to inform the Compliance Officer of anyone to whom they disclose Inside Information during the normal discharge of their profession or job duties, so that said persons may also be included in the corresponding section of the Insider List. The Compliance Officer must also inform Insiders that they have been included on the Insider List and of any other aspects that they must be notified of under prevailing personal data protection regulations.

Furthermore, the Compliance Officer must take reasonable steps to ensure anyone on the Insider List acknowledges in writing the legal and regulatory obligations this entails for them and that they are aware of the penalties for performing transactions using Insider Information and for the illicit disclosure of such information.

The necessary security measures will be established to ensure the safekeeping, filing, reproduction and distribution of and access to the Inside and Relevant Information in accordance with the restrictions stipulated in this Code of Conduct.

The Company shall monitor the market performance of the Marketable Securities and Financial Instruments issued by the Company and shall likewise follow all the latest news issued by the specialist economic press and other media outlets, when this might affect them. Should there be any unusual market activity in terms of trading volumes or prices, and plausible reasons to suspect that this is due to the premature, partial or distorted dissemination of Inside Information, the Company will immediately inform the CNMV as established in articles 226 and 227 of the LMVSI and article 17 of the MAR.

Subject Persons privy to any Inside Information and, in any event, Insiders will be obliged to:

- (a) Safeguard the confidentiality of the Inside Information to which they are party, without prejudice to their duty of disclosure and cooperation with the judicial and administrative authorities under the terms established in the LMVSI, MAR and other applicable legislation;
- (b) Strictly limit access to the minimum essential persons, within or outside the Company;
- (c) Expressly warn the persons to whom Inside Information has been disclosed of the nature of such information and of their duty of confidentiality and secrecy and the prohibition of its use.

- (d) Take appropriate measures to avoid such information being used for abusive or unfair purposes; and
- (e) Notify the Compliance Officer, as soon as possible, that they have had access to inside information and immediately of any abusive or unfair use of the Inside Information of which they are aware.

Inside Information is to be made known immediately to the CNMV by the persons specifically authorised by the Company. This notification is to be made prior to its dissemination by any other means and as soon as the Inside Information becomes known, except where there are reasons making it necessary to delay disclosure as per article 229 of the LMVSI in relation to Article 17.4 of the MAR.

Other Relevant Information is to be made known to the CNMV by the persons specifically authorised by the Company.

The content of the notification of Inside Information and Other Relevant Information has to be true, clear and complete. All of the above is in accordance with the provisions set out in the LMVSI and other applicable provisions. Disclosure of Inside Information shall also be subject to the obligations stipulated in articles 8, 9, 10 and 17 of the MAR and the implementing regulations thereof.

Inside Information and Other Relevant Information is to be available on the Company's website as soon as it has been reported to the CNMV.

The Compliance Officer shall periodically supervise that the content of the Company's website fulfils the aforementioned requirement and, in general, all the information requirements deriving from the Company's listed company status.

The Chairman of the Board of Directors, subject to consultation with the Managing Director and/or Finance Director and/or Secretary to the Board and/or Compliance Officer, is to confirm or deny, as applicable, any public information on circumstances considered to be Inside Information.

In order to ensure that Inside Information is transmitted to the market in a symmetrical and equitable manner, Subject Persons are to abstain from furnishing third parties (analysts, shareholders, investors or the press) not included on the Insider List with said information that has not been reported, previously or simultaneously, to the CNMV to ensure its dissemination to the market in general.

Subject Persons must act with the utmost diligence possible to duly safeguard Inside Information in the strictest confidence, so that normal trading of the Marketable Securities and Financial Instruments cannot be affected by third parties obtaining access to it.

## **9. PROHIBITION OF MARKET MANIPULATION**

Subject Persons shall abstain from any type of practice that may involve market manipulation, as per applicable legislation in force at the time.

According to article 12 of the ,MAR, market manipulation shall comprise the following activities, without prejudice to others that may be stipulated in the applicable legislation in force at the time.

- (i) Entering into a transaction, placing an order to trade or any other behaviour which:
  - (a) Gives, or is likely to give, false or misleading signals as to the supply of, demand for or price of the Company's Marketable Securities or Financial Instrument; or
  - (b) secures, or is likely to secure, the price of one or several of the Marketable Securities or Financial Instruments.

Unless the person entering into a transaction, placing an order to trade or engaging in any other behaviour establishes that such a transaction, order or behaviour has been carried out for legitimate reasons, and conforms with a market practice accepted by the CNMV.

- (ii) Entering into a transaction, placing an order to trade or any other activity or behaviour which affects or is likely to affect the price of one or several of the Marketable Securities or financial Instruments.
- (iii) Disseminating information through the media, including the Internet, or by any other means, which gives, or is likely to give, false or misleading signals as to the supply of, demand for or price of one or several of the Marketable Securities or Financial Instruments, including the spreading of rumours, where the person disseminating the information or rumours knew, or ought to have known, that the information was false or misleading.

Market manipulation shall also include taking advantage of occasional or regular access to traditional or electronic media by voicing an opinion about the Affected Securities (or indirectly, about the Company) while having previously taken positions in the Affected Securities and profiting subsequently from the impact of the opinions voiced on the price of the Affected Securities, without having simultaneously disclosed that conflict of interest to the public in a proper and effective way.

- (iv) Transmitting false or misleading information or providing false or misleading inputs in relation to a benchmark where the person who made the transmission or provided the input knew, or ought to have known, that it was false or misleading, or any other behaviour which manipulates the calculation of a benchmark.
- (v) The conduct by a person, or persons acting in collaboration, to secure a dominant position over the supply of or demand for the Affected Securities which has, or is likely to have, the effect of fixing, directly or indirectly, purchase or sale prices or creates, or is likely to create, other unfair trading conditions.
- (vi) The placing of orders, including any cancellation or modification thereof, by any available means of trading, including by electronic means such as algorithmic and high-frequency trading strategies, and which has one of the effects referred to in points i) and ii) above.

- (vii) The buying or selling of the Affected Securities, at the opening or closing of the market, which has or is likely to have the effect of misleading investors acting on the basis of the prices displayed, including the opening or closing prices.

The following transactions or orders will not be treated as market manipulation:

- (a) Those originating in the execution by the Company of treasury share buyback and stabilisation of securities programmes, so long as they meet the conditions set out by law to do so;
- (b) Transactions performed under liquidity contracts; and
- (c) In general, all transactions carried out in compliance with applicable legislation.

## **10. TREASURY STOCK TRANSACTIONS**

For the purposes of this Code, treasury stock transactions shall be taken as those carried out by the Company that involve the Company's shares or financial instruments or contracts of any kind, whether or not traded on a stock exchange or other organised over-the-counter market, that grant the right to acquire, or whose underlying assets are, shares in the Company.

Treasury stock transactions must always have legitimate purposes, such as: providing investors with appropriate liquidity and depth when trading in the Company's shares; executing treasury share buyback programmes, approved by the Board of Directors in accordance with the Spanish Limited Liability Companies Act (*Ley de Sociedades de Capital*); honouring previously assumed legitimate commitments; or any other purposes that are acceptable under applicable legal provisions. Treasury stock transactions must never be designed to distort the free formation of prices, giving misleading signals as to volume that could suggest there is a higher demand for or supply of the Company's shares than there would be in the interaction of supply and demand in a free market, and misleading investors regarding the degree of liquidity of the shares. Specifically, any of the acts referred to in article 12 of the MAR and in article 9 of this Code shall be avoided.

Treasury stock transactions shall in no event be carried out on the basis of Inside Information.

There shall be total transparency with regard to treasury share transactions in dealings with market supervisors and governing bodies.

As the body responsible for executing treasury stock transactions, the Finance Department will perform the following duties:

- (i) Appoint the Treasury Stock Portfolio Manager;
- (ii) Regularly report, directly and indirectly, to the Audit and Compliance Committee on transactions involving the Company's treasury shares, and financial instruments and contracts of any nature traded on organised over-the-counter markets conferring the right to buy or whose underlying are said shares;
- (iii) Manage the treasury stock portfolio pursuant to the provisions set forth in this article;

- (iv) Monitor the market performance of the Company's shares when treasury stock transactions are executed;
- (v) Keep a record of all treasury stock transactions ordered and executed; and
- (vi) Notify the CNMV of executed treasury stock transactions, in accordance with applicable laws and regulations, and of any liquidity contracts the Company has or plans to entered into with a market member.

The Company shall endeavour to ensure that treasury stock management is carried out separately from the rest of its activities. Treasury stock managers will therefore sign a special confidentiality agreement regarding treasury stock transactions.

As well as the provisions in this article, when executing treasury stock transactions, the Company will fulfil any other obligations and requirements deriving from prevailing applicable laws and regulations, and will only deviate from the discretionary treasury stock transaction guidelines issued by the supervisory authorities when there are grounds to do so.

The Compliance Officer is to report annually to the Board of Directors and, whenever they consider it necessary or are required to do so, to the Audit and Compliance Committee, on the measures adopted to ensure compliance with the provisions of the Code and the degree of compliance with it.

## **14. UPDATING**

This Code will be updated by the Board of Directors whenever this is necessary to bring its contents into line with the applicable provisions in force.

## **15. NON-COMPLIANCE**

Any breaches of the provisions of this Code of Conduct shall be reported immediately to the Compliance Officer by anyone detecting such non-compliance.

Should a breach be detected, and without prejudice to the provisions set forth in the following paragraphs, the Compliance Officer must inform the Audit and Compliance Committee in the next meeting of this body of any incidents that have arisen and any investigations opened, if applicable.

Failure to comply with the terms of this Code of Conduct shall be treated as misconduct, the seriousness of which will be determined by following the procedure set out under prevailing provisions.

The foregoing shall apply without prejudice to any administrative, civil or criminal liability that the person breaching this Code of Conduct may face, and any other consequences laid down in prevailing legislation.

Type of association:
